

CERTIFICATE OF CONFORMITY**REACH — SVHC (ECHA CANDIDATE LIST OF SUBSTANCES OF VERY HIGH CONCERN)**

Dear Madam or Sir,

The new EU directive for Registration, Evaluation and Authorization of Chemicals, REACH has been in force (EC 1907/2006) since June 2007.

The pre-registration phase for manufacturers and downstream suppliers of existing or phase-in chemicals was from June 1st 2008 to November 30th 2008.

We confirm that all CRYLUX[®] acrylic sheets clear and colored are in compliance with the REACH directive.

The sheets are manufactured from acrylic polymers and exempt from registration.

Our suppliers of raw materials, master batches and additives have confirmed the pre-registration and the registration of the raw materials, additives and colours we use to produce our acrylic polymers.

We also confirm that the substances on the “ECHA candidate list SVHC, actual status 14.06.2023“ are not contained in our products.

Polycasa as a polymer and plastics producer will maintain close contact with our suppliers and customers to ensure REACH implementation throughout the complete supply chain.

All relevant information will be communicated to customers and suppliers as necessary.

We will continue to be able to supply you with all the products in our range. We will inform you in a timely manner if any changes arise in the future.

For further information please contact your account manager or our customer services representatives in Geel.
