

STRATOS

AUTOMATIC ROLL-SLITTER WITH MOTORIZED BLADE

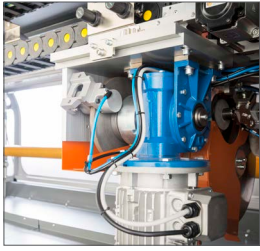

Automatic sturdy and affordable roll-slitter for industrial use.
It allows to slit up log rolls of different sizes to obtain narrow reels.

- > Sturdy roll-slitter designed to be durable and satisfy high performing jobs
- > Log rolls can be cut by setting the manual or automatic mode
- > Possible adjustments for automatic cutting mode: size and number of rolls to cut (visualisation of the cut rolls), mandrel speed, movement speed of the cutting unit, cutting penetration speed of the blade, programming (or exclusion) of the lubrication for blade
- > Settings: width of the log rolls to cut (up to 10 different widths cut programmable from narrow to wide slits)
- > 3 blade options: blade braked, free blade rotating, motorized blade
- > LCD touch screen display for a quick setting of machine functions

SUITABLE FOR:

- Adhesive films
- Plastic films
- Masking tapes
- Foam
- Application tape
- Double-sided tape
- Fabric
- Non woven
- Many more..

Compact cutting unit positioned at the top for easy cleaning of the working area

X and Y axis controlled by brushless motor system

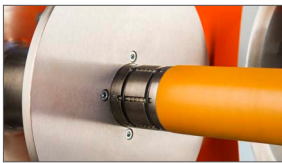

LED illumination in cutting area

Touch screen display

Pneumatic lifting and lowering of the mandrel to facilitate the loading and unloading of the log rolls and slit reels

Full pneumatic automatic expansion of the mandrel to block the rolls on shaft

Adjustable blade angle

Adjustable sharpeners pressure

Adjustable blade sharpeners

Working width	1700 mm (67 in.)
Maximum roll height	1750 mm (69 in.)
Maximum external roll diameter	Ø 320 mm (13 in.)
Rolls core	Ø 76 mm (3") e Ø 50 mm (2")
Blade (standard)	385 mm (15 in.)
Speed of the mandrel	da 0 a 600 giri/min. (da 0 a 10 rpm/min.)
Supply	400V (3P) - 50 Hz - 6000 W
Dimensions (W x D x H)	2740 x 1570 x 1640 mm (108 x 62 x 65 in.)
Weight	800 kg (1764 lbs.)

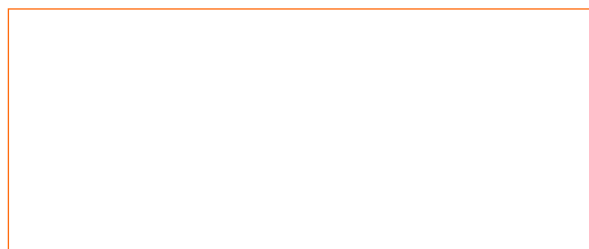

Manufactured in compliance with CE regulations
